

BRUKER D2 PHASER X-ray Diffractometer (XRD): D2 PHASER is the most compact and fastest, all-in-one amorphous and crystalline phase analysis tool available. It is ideal for Material science laboratory. Ease-of-use, high performance are the key features of the D2 PHASER desktop diffractometer. The D2 PHASER is a good X-ray powder diffraction for e.g. cement, minerals, geology, chemistry, pharmaceuticals, as well as for educational purposes.

Standard sample stage for 51.5 mm diameter sample holders provide user-easy handling.
